TEMPOMATIC 4 urinal valve

Ref. 479410

Electronic with integrated batteries

2025 UK public price excluding VAT: £399.61

ADVANTAGES

Total hygiene: no manual contact

High-frequency mode

Batteries integrated into the valve body

Hygienic duty flush

DESCRIPTION

TEMPOMATIC 4 urinal valve - Ref. 479410

Exposed electronic urinal valve with integrated batteries:

Battery-operated with integrated CR 123 3V Lithium batteries.

For wall-mounted, exposed installation.

Reduced-stagnation solenoid valve and electronic unit integrated into the valve body.

Shockproof infrared presence detection sensor.

Detection delay is 10 sec.

3 programmes (rinsing volume adjustable in accordance to the type of urinal). High-frequency mode (exclusive to DELABIE):

- short rinse after each user
- complementary rinse after busy period.

Hygienic duty flush, every 24hr after last use, prevents vacuums in the siphon. Compatible with rain water.

Flow rate 0.15 L/sec. at 3 bar, can be adjusted.

Integrated stopcock and flow rate adjuster.

One-piece chrome-plated metal body.

M½" connection.

Straight for in-line supply, outlet M½" 35mm gap from wall.

Suitable for people with reduced mobility.

30-year warranty.

Ideal for replacing old installations:

Can easily be installed where there was previously a time flow urinal.
