

BINOPTIC 2 A NEW RANGE OF ELECTRONIC TAPS & MIXERS

Responsible design, impeccably done

Satin finish
H. 100mm

Chrome finish
H. 170mm

Matte black finish
H. 250mm

DELABIE refs.: 474 110 (chrome) and 375 130 (matte black)

DELABIE, the European leader in taps and sanitary ware for public places, is proud to present the new BINOPTIC 2 electronic basin tap range—an innovative solution that combines performance, aesthetics, and durability to meet the evolving challenges of public and commercial washrooms.

What dreams are made of

In a world where trends come and go in the blink of an eye, the BINOPTIC 2 will remain a lasting fixture, maintaining its elegance for years. The secret behind its timeless design? Minimalism. A stainless steel body with a sleek curve—an exercise in refined restraint.

The tap (BINOPTIC 2) and the mixer (BINOPTIC MIX 2) are both available in three heights and three finishes—chrome, satin, and matte black. This variety ensures compatibility with all types of basins.

The low model (H. 100mm) is ideal for classic basins or recessed sinks in countertops. The mid-height model (H. 170mm) will enhance semi-recessed basins. The tall model (H. 250mm) will create a stylish and graceful pairing with countertop basins.

For those who prefer wall-mounted fittings, we've got you covered. The wall-mounted version, available in different lengths, installation modes, and finishes, ensures that no washroom is left without a BINOPTIC 2.

A technological gem for exacting plumbers

The result of decades of innovation, the BINOPTIC 2 brings together the best of DELABIE.

First innovation: Everything—the solenoid valve, the sensor, and the electronic unit—is integrated into a compact 28mm-diameter head. No small feat! Whether for installation or maintenance, professionals no longer need to access beneath the basin, inside false ceilings, or behind walls. The time savings are substantial.

The right to (dis)connect

Second innovation: Some BINOPTIC 2 models feature Bluetooth® connectivity, enabling communication with the DELABIE Connect mobile app. This allows for easy configuration, with settings that can be copied and applied across multiple taps or mixers.

The app also provides real-time usage statistics. For professionals who prefer a more hands-on approach, adjustments can also be made manually using a concealed button located between the sensor and the water outlet.

Designed for public use

Beyond its sleek design and remarkable practicality, the BINOPTIC 2 is ultimately designed to meet the needs of users. Its responsive and intuitive sensor ensures effortless use for people of all ages and mobility levels, including those with reduced mobility.

The pre-set flow rate of 3 lpm (adjustable) is delivered through an aerator, providing the ideal amount of water for handwashing. The water flow stops as soon as the user moves away – because in public spaces, as at home, every drop counts.

A hygienic solution

Maintaining hygiene in public washrooms is an ongoing challenge, and the BINOPTIC 2 is here to help.

Touch-free activation means users keep their hands clean—especially when paired with a BINOPTIC soap dispenser.

To guarantee the health of the water system, a periodic duty flush occurs 24 hours after the last use, preventing water stagnation and bacterial growth.

Say goodbye to Legionella.

Wall-mounted chrome
L. 220mm

Certain BINOPTIC 2 models can be configured via Bluetooth®

PRODUCT BRIEF / BINOPTIC 2 ELECTRONIC BASIN TAPS & MIXERS

Minimalist yet elegant, the new BINOPTIC 2 range is a technical masterpiece. Available as a tap or mixer tap, in three finishes (chrome, satin, matte black), three heights (low, mid-height, tall), and a wall-mounted version, it offers flexibility for any setting. With Bluetooth® connectivity or manual adjustments, it perfectly balances the needs of plumbers, user comfort, and eco-conscious requirements. BINOPTIC 2: The new solution for stylish, high-performance washrooms.
