

STAINLESS STEEL, THE IDEAL SOLUTION TO COMBAT VANDALISM IN PUBLIC PLACES

Shatterproof stainless steel: made to last

Durable and shatterproof

Bacteriostatic and easy to clean

Suitable for any project

Withstands vandalism and intensive use

Public places are too often subjected to vandalism, and toilets are no exception. This vandalism can take two forms: voluntary and involuntary vandalism. In the case of voluntary vandalism, the user deliberately seeks to damage or even destroy the installation. It is impossible to prevent it completely, but it is possible to limit it with suitable products. The use of stainless steel sanitary appliances is one solution.

In the case of unintentional vandalism, the user does not seek to damage the sanitary equipment. But they can damage it if they don't understand how it works, and handle it roughly.

To combat unintentional vandalism, it is important to install products that are suitable for the location: resilient, intuitive and ergonomic.

To combat voluntary or involuntary vandalism, DELABIE has designed washbasins, WCs and urinals made from a durable material: stainless steel.

The products' specific ergonomics, particularly their robust design, smooth lines and tamper-proof fixings, prevent any risk of injury. Cross wall models are particularly effective in the event of more serious vandalism. With the cross wall models, the operating parts and fixings cannot be accessed by the user.

Specialist products for resilient washrooms

The squat WC pan is perfectly hygienic, since there is no direct contact with the WC pan. It can be quickly flushed with plenty of water, facilitating servicing greatly. Since it is recessed, it reduces the likelihood of vandalism. DELABIE offers 4 squat WC pan models: 2 sizes (700 x 700mm or 500 x 600mm) with or without trap.

Ideal for installation in prisons or police stations, DELABIE Combis are equipped with a washbasin and WC welded solidly together, and feature a recessed toilet roll holder. They are also equipped with a DELABIE time flow tap. DELABIE's combi units guarantee safety and resilience over time thanks to their robust design, a higher stainless steel thickness of 2mm, and rounded edges. They are available in many versions suitable for all configurations: floor-standing or wall-hung WCs; cross wall or wall-mounted versions; with the WC on the right, left or in the middle; and with or without a cistern.

Thanks to its shrouded basin, concealed trap and flat perforated waste (with no screws), the TEK washbasin is ideal for washrooms that need to withstand intensive use.

Equipped with an integrated tap, the TEK washbasin is available in various versions: cross wall or wall-mounted, with electronic or time flow tap, and with 1 or 2 buttons - cold water / mixed water.

PRODUCT BRIEF/ DELABIE, SPECIALIST IN WASHROOM EQUIPMENT FOR NON-DOMESTIC USE

Public washrooms are subjected to acts of voluntary and involuntary vandalism. To remedy this, DELABIE has developed suitable solutions: robust and durable, DELABIE products from the stainless steel sanitary ware range are designed and adapted to withstand intensive use. Perfect examples of these solutions are the squat WC pan, the Combi and the TEK washbasin.
